

GLOBAL TASK FORCE ON

**CHOLERA CONTROL**

# WASH / CHOLERA TRAINING MATERIALS AND CAPACITY BUILDING

A few ideas to set the floor for  
an open discussion

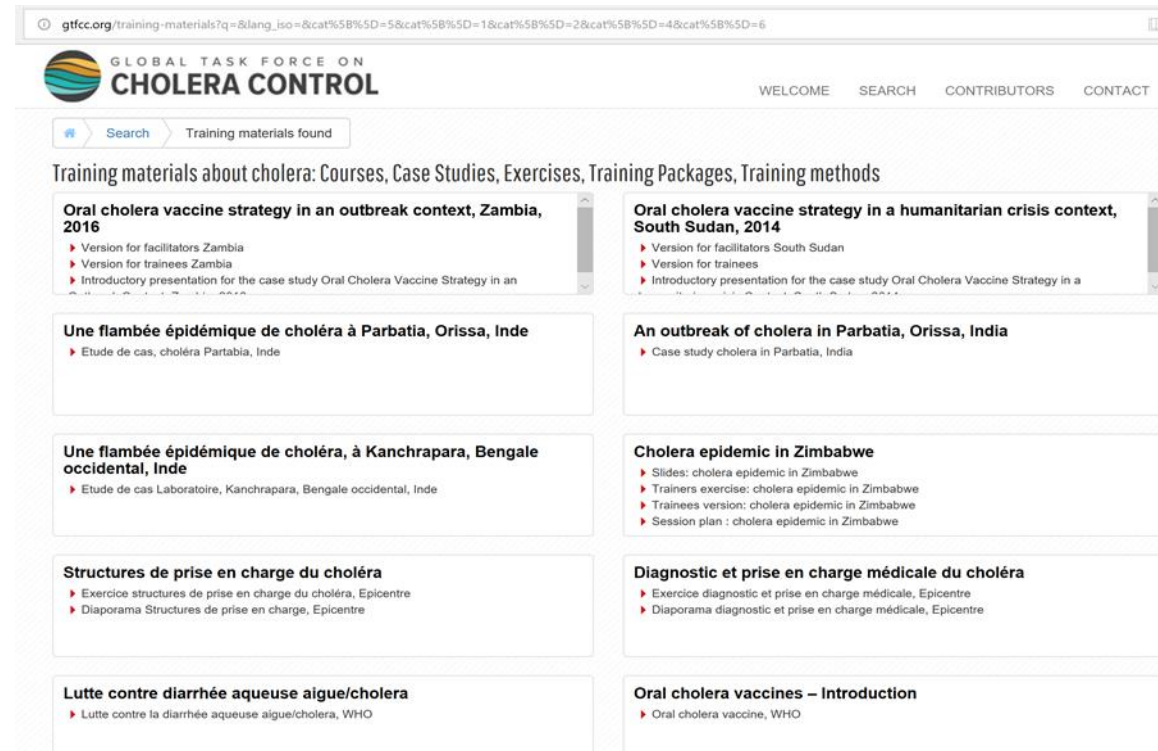

CDC/CARE/IFRC/IMC/MSF  
/OXFAM/REGIONAL CHOLERA  
PLATFORMS/GLOBAL WASH  
CLUSTER

# SOME OF THE RECENTLY USED TRAINING PACKAGES AMONG GTFCC PARTNERS

- Epidemiology and Data Collection Methods for WASH in Emergencies (CDC, Global WASH Cluster and UNICEF)
- Water quality monitoring / microbiological testing (CDC), KAP WASH survey training (CDC)
- WASH and IPC in Cholera response (CDC/WHO/UNICEF), Integration of OCV as part of Emergency response (WHO)
- RdT and interpretation (Pasteur Institute and UNICEF)
- National Cholera Plan and multisectorial Emergency response (UNICEF and Bioforce)
- GIS and mapping of cholera (UNICEF), WaSH in Emergency – including cholera response (2iE and UNICEF)
- Community based surveillance (CARE)
- Rapid Response Teams (Oxfam)
- Cholera modules as part of MSF trainings (Rapid Response in Precarious Situations, WASH in emergencies, Vaccination, WASH operational research)

# EXISTING TRAINING PACKAGES AS COLLECTED IN THE GTFCC REPOSITORY

- 73 training materials about cholera (Courses, Case Studies, Exercises, Training Packages, Training methods)
- None of the recently used are included in the repository

The screenshot shows the website for the Global Task Force on Cholera Control (GTFCC). The page title is "GLOBAL TASK FORCE ON CHOLERA CONTROL". The search results are for "Training materials about cholera: Courses, Case Studies, Exercises, Training Packages, Training methods". The results are displayed in a grid of cards, each representing a training material. The cards include the following titles and descriptions:

- Oral cholera vaccine strategy in an outbreak context, Zambia, 2016**
  - ▶ Version for facilitators Zambia
  - ▶ Version for trainees Zambia
  - ▶ Introductory presentation for the case study Oral Cholera Vaccine Strategy in an outbreak context, Zambia, 2016
- Oral cholera vaccine strategy in a humanitarian crisis context, South Sudan, 2014**
  - ▶ Version for facilitators South Sudan
  - ▶ Version for trainees
  - ▶ Introductory presentation for the case study Oral Cholera Vaccine Strategy in a humanitarian crisis context, South Sudan, 2014
- Une flambée épidémique de choléra à Parbatia, Orissa, Inde**
  - ▶ Etude de cas, choléra Parbatia, Inde
- An outbreak of cholera in Parbatia, Orissa, India**
  - ▶ Case study cholera in Parbatia, India
- Une flambée épidémique de choléra, à Kanchrapara, Bengale occidentale, Inde**
  - ▶ Etude de cas Laboratoire, Kanchrapara, Bengale occidentale, Inde
- Cholera epidemic in Zimbabwe**
  - ▶ Slides: cholera epidemic in Zimbabwe
  - ▶ Trainers exercise: cholera epidemic in Zimbabwe
  - ▶ Trainees version: cholera epidemic in Zimbabwe
  - ▶ Session plan : cholera epidemic in Zimbabwe
- Structures de prise en charge du choléra**
  - ▶ Exercice structures de prise en charge du choléra, Epicentre
  - ▶ Diaporama Structures de prise en charge, Epicentre
- Diagnostic et prise en charge médicale du choléra**
  - ▶ Exercice diagnostic et prise en charge médicale, Epicentre
  - ▶ Diaporama diagnostic et prise en charge médicale, Epicentre
- Lutte contre diarrhée aqueuse aigue/cholera**
  - ▶ Lutte contre la diarrhée aqueuse aigue/cholera, WHO
- Oral cholera vaccines – Introduction**
  - ▶ Oral cholera vaccine, WHO

# SOME OF THE ISSUES IDENTIFIED: WASH / CHOLERA TRAINING MATERIALS

- Some work needed in relation to **collection** of recently developed material / cleaning of the repository. Some thematic mapping of trainings to be done?
- **Some topics may not be very well covered** in the existing material:
  - community engagement in cholera response, prevention and control
  - community level preparedness and response planning
  - broader use of mobile technology to collect and analyse community feedback
  - understanding of socio-cultural perception on household / community level water treatment,
  - IPC measures rollout and pre-positioned at communities
  - Final safe disposal of the medical waste
  - Nutrition and health integration
  - Harmonizing hygiene promotion and cholera-specific messaging
  - ...
- **Need to consider accessibility of training materials to all levels of local staff and partners**, especially given move to localisation, needs of local actors etc.
- **Need to consider training needs linking cholera in development WASH, outside of response** where most of our capacity appears to lie.

# SOME WAYS FORWARD ON CAPACITY BUILDING PROCESS ?

- Gaps and needs analysis among the WASH sector and at country level (government, local actors etc.), with a multi-sectoral lens ?
- Capacity building strategy potentially prioritising RRTs and first responders health care staff?
- Role of **different levels/partners** in developing material and providing support for roll out (GTFCC global level, WASH working group, Cluster, regional platforms, etc)?
- **Review of capacity building** rolled out at key countries?
- Think about how capacity building process would / could be **measured** ?
- Question of some GTFCC validation of “**training packages**” or “**minimum competences**”?
- Refresher trainings? **Sustainability? Partnerships** with local/international universities?
- **Link with other diseases?** Trainings beyond Cholera?
