

GLOBAL TASK FORCE ON
CHOLERA CONTROL

UPDATE ON THE GTFCC WEBSITE

Valentina Picot,
Fondation Mérieux,
April 2019

GTFCC WEBSITE

- An instrument to enable a one-stop access to countries and partners to be informed / have access to resources / request for support – on cholera and GTFCC activities.
- Country / End-user perspective
- Tailored in a “sort” of phone application fashion to facilitate navigation – Mobile compatible
- Straightforward and simple
- Branding (color palette and other features) matching current GTFCC

IMPROVING THE PREVENTION AND CONTROL OF CHOLERA

The GTFCC brings together all multi-sector technical partners from around the world to support countries in their fight against cholera

OUR MISSION

Cholera remains a **major public health** problem wherever **safe drinking water** and **basic sanitation** are lacking.

CHOLERA

2nd leading cause of death among children under 5

90%

OF DEATHS

from diarrhea are caused by a lack of access to safe drinking water and basic sanitation

663

MILLION PEOPLE

use unsafe drinking water

2.4

BILLION PEOPLE

lack access to basic sanitation facilities (toilets, latrines)
