

Moving forward after a successful emergency response - Mozambique

MINISTÉRIO DA
SAÚDE

Moçambique

6th Annual meeting of the Global Task Force
on Cholera Control (GTFCC)

Veyrier du Lac ,2019

Country response and progress for Cholera control

Cyclone response

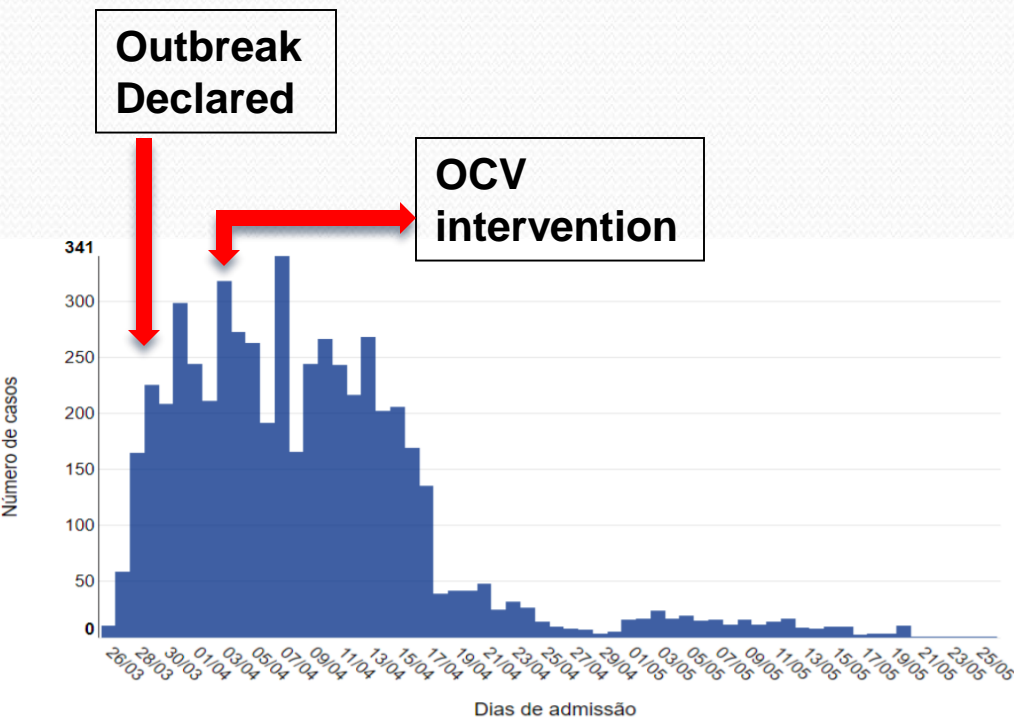

- Multisectoral intervention;
- **Speed** of activities;
- **Coordination mechanism** in the implementation of activities.

Progress ins last years

- Involvement of the president of the republic in the discussion of cholera control strategies;
- Strengthening of the group working with cholera;
- Establishment of strategic partnerships that raised awareness of the need for solutions to control (**WHO, AMP and IVI**)

Country perspective using Combined Strategy – OCV and WASH

- Rapid access to the global stockpile allows a better complementarity of strategies;
- The complementarity of the strategies allows a greater sustainability of the systems (from surveillance to case management).

Support expected from GTFCC

- Development and endorsement of the cholera control plan;
- Reinforcement of surveillance (enhanced systems);
- Support to establish a coordination mechanism in cholera initiatives;
- Innovative forms of multisectoral engagement;
- Inclusion in the main strategic discussions;
- Technical assistance in accessing the stockpile.

Obrigado!!

Merci!!

Thank you!!

Kanymambo!!
