

GLOBAL TASK FORCE ON  
**CHOLERA CONTROL**

**WASH WG WORK STREAM “WASH IN NCPs”**  
**GTFCC WASH WG MEETING — 9-10 MARCH 2022**

Christophe Valingot Delaurenti  
IFRC / CSP

# WASH IN NCPs

## Workstream description

To achieve the goals set in the 2030 cholera roadmap, a **very strong engagement of the WASH sector** will be needed both for **emergency response** and **long-term cholera prevention**.

In order to mobilize WASH partners and donors, **it is crucial to define a common approach for the WASH sector in National Cholera Control Plans (NCPs) and how to identify needs, implement activities, and measure progresses of WASH interventions over time.**

**WASH in NCPs sub-group** will help define GTFCC guidance and tools on how the WASH sector should identify, prioritize, plan and implement WASH interventions in cholera hotspots.

# WASH IN NCP<sub>s</sub>

The conception and execution of an NCP can be divided into four phases:

- **Inception**
- **Development**
- **Implementation**
- **Monitoring & Reporting**

Figure A

# WASH IN NCP<sub>s</sub>

## Objectives

- To support the development of methodology and tools for WASH assessments in cholera hotspots and planning / budgeting for NCPs, advocacy and resource mobilisation
- To support the development of guidance, SOPs for selecting context-appropriate WASH interventions for NCP implementation
- To support the development of monitoring and evaluation plans to measure progresses and report on NCP achievements

# WASH IN NCPs Workplan

| Main items                               | Detailed activity   | Update on progresses                                       |
|--|---|--|
| ToRs for NCP –WASH WG                    | Develop Terms of Reference for country WASH WG to develop the NCP and monitor progress  | Already developed (in draft)                               |
| WASH assessment and planning methodology | Develop WASH assessment and planning methodology for the development of National Cholera Plan (NCPs), advocacy and resource mobilization. | to be discussed<br>(follow up session)                     |
| WASH costing tools                       | Develop WASH costing guidance and tools for NCP budgeting and programming of WASH interventions in cholera hotspots                       | to be discussed<br>(follow up session)                     |
| WASH implementation Guidelines           | Develop Technical Guidance / Framework for selecting context-appropriate WASH interventions for NCP implementation                        | WASH – Cholera interventions by context – TUFTs University |

# WASH IN NCP<sub>s</sub>

## **Challenges:**

Reconcile the work already been done with needs at different stages of the NCP process (development, implementation, monitoring)

## **Opportunities and looking ahead:**

Work has already been done !

Synergies with other WASH WG – workstreams (WASH Data, Advocacy)

# WASH IN NCP<sub>s</sub>

## Sub-group members

### Name and organization:

Abel Augustinio – GTFCC/CSP

Annika Wendland – GTFCC/CSP

Pierre-Yves Oger - UNICEF

Justine Haag – GTFCC/WHO

Daniele Lantagne – TUFTs University

Christophe Valingot Delaurenti – IFRC / CSP
