

# Hotspot and OCV

*Prof. Dr. Md. Nazmul Islam*  
Director, Disease Control  
and  
Line Director, CDC  
DGHS, Bangladesh

# Hotspot mapping

- Nationwide Cholera Surveillance is conducted through 16 sentinel surveillance sites – 4 enhanced surveillance and 12 standard surveillance.
- EWARS ongoing Cox's Bazar

## Ongoing activities in Surveillance

- Dehydration status of diarrhea cases at admission is introduced in DHIS-2 and web-based disease surveillance
- Consultant is getting hired for comprehensive Priority Area for Multisectoral Intervention (hotspot mapping) based on available current data

# Oral Cholera Vaccine

*Oral Cholera Vaccine Requirement till 2024 in line with the NCCP*

Year	1	2	3	4	5	6	7
	2019	2020	2021	2022	2023	2024	Total
District #	DCC (demonstration)	DCC part	4 districts including DCC	6 (Year 4 + year1)	6 (Year 5 + year2)	5 (Year 6 + year3)	
Population in million	1.2	5.45	13.30	21.15	25.40	19.95	86.45
OCV dose required	2.4 million	10.9m	26.6m	42.3m	50.8m	39.9m	172.9m

- ❖ Due to Covid-19 and other factors, we got only 5.8 million doses between Feb 2020 to August 2022 in Dhaka ~3.3% of that was projected in NCCP

## Priorities

- ❖ Develop Multi year plan for preventive vaccination campaign based on hotspot and in GAVI template
- ❖ Vaccinate migrant workers and pilgrims travelling during peak season
