

GLOBAL TASK FORCE ON
CHOLERA CONTROL

WASH
WORKING GROUP UPDATE

Arielle Nylander
GTFCC Annual Meeting
26th June 2023

ACHIEVEMENTS

Published Environmental Surveillance (WASH and LAB) technical guideline

UN Water Conference joint side event with a Call to Action

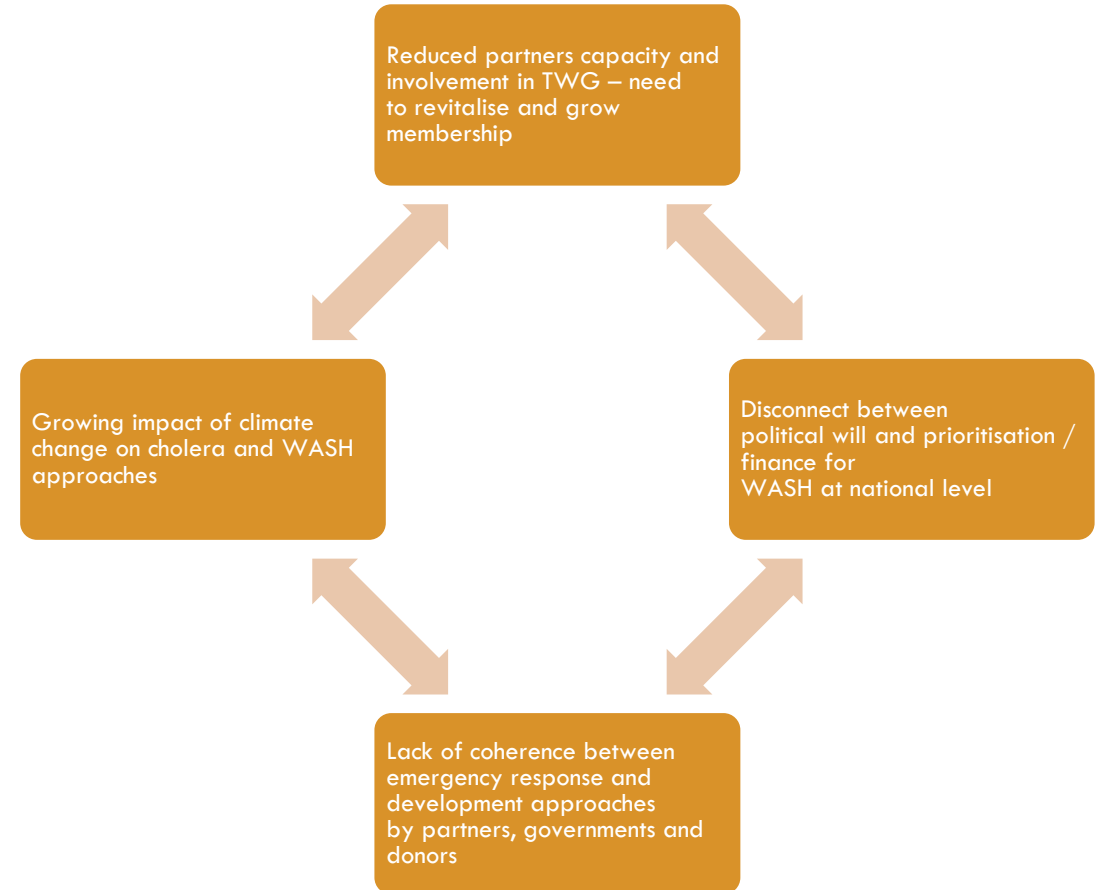

Raised WASH profile at AU High-Level Emergency Ministerial Meeting on Cholera Epidemics

Partner resource on testing and treatment strategies in different settings

Grew evidence base on WASH for cholera control through partner action research

Accessible WASH-oriented resource to support NCP development (ongoing)

CHALLENGES

PLANS FOR THE NEXT 12 MONTHS

Focus on specific high-impact workstreams

- Water Quality Monitoring – guidance and national engagement
- Wash Data – improving global data collection to guide intervention
- WASH in NCPs – working with CSP and partners to strengthen and implement WASH components

Improve integration and collaboration with other pillars and Advocacy Task Team

- Cross-cutting integration of research, case studies and advocacy
- Contribute to development of the climate annex to the research agenda

WASH prioritisation and integration at national level

- Build the investment case around WASH for cholera prevention and control
- Integrate WASH into national budget cycles, with other ministries involved in cholera control
- Engage MDBs and other donors around cholera-sensitive investment

Thank you

Together we can
#endcholera
