

# Discharge

- ❑ Ensure patients and their caregivers understand that anyone with at least 3 episodes of diarrhoea in 24 hours should seek treatment.
- ❑ Ensure all patients and their caregivers understand how to prevent cholera before discharge.
- ❑ Provide at least 4 packets of ORS for all patients who are discharged to use at home.  
*The packets can also be used for any family members or neighbours how begin to have diarrhoea.*
- ❑ For paediatric patients give sufficient zinc to complete 10 days treatment.
