

PAMIs for cholera elimination

Introduction

GLOBAL TASK FORCE ON
CHOLERA CONTROL

PAMIs for cholera elimination

Course
overview

Who is this course for?

➡ Technical professionals

Directly involved in PAMI identification for cholera elimination
(e.g., epidemiologists, data managers, workshop facilitators, report writers, etc)

What will you learn?

- **Method** and **steps** to identify PAMIs for elimination
- What the “**vulnerability index**” is
- How to **prepare the data**
- How to use the **PAMI Excel tool**
- Objectives and recommended format of the **stakeholder validation**
- How to **document** PAMI identification and request a **review**

What are the modules?

25'

Module 1
Method

20'

Module 2
Data
preparation

15'

Module 3
PAMI
Excel tool

15'

Module 4
Stakeholder
validation

10'

Module 5
Document
& Review

When to take this course?

Completing the GTFCC online course
Identification of PAMIs is a prerequisite

<https://tinyurl.com/coursePAMlintro>

How to navigate this course?

➡ Take this course at your own pace

- You can take the entire course **at once**
or
- You can take the different modules **at different times**
as PAMI identification progress in your country

Get ready for the course

Before starting the course, download the following material

Template report

Identification of Priority Areas for
Multisectoral Interventions (PAMIs)
for cholera elimination

Guidance Document
2023

Identification of
Priority Areas for Multisectoral Interventions (PAMIs)
for cholera elimination

Step-by-step GTFCC tool user guide
2023

Template report on the identification of PAMIs
for cholera elimination

- I. Background**
- Information on any previous identification of PAMIs (method, analysis period)
 - Information on MCP status and targets (past, current, and future) in the country
 - Concise description of the cholera epidemiological situation in the country and cholera control efforts in recent years (up to last 10 years)
 - Concise description of cholera surveillance system
 - Concise description of cholera testing strategy
 - Justification for using the method "PAMIs for cholera elimination" (i.e., provide percentage of MCP operational geographic units with confirmed cholera outbreaks consistently over the past five years)
- II. Methods**
- Supporting information**
- Administrative level of MCP operational geographic units

Get additional support

**For any question or for technical assistance to identify PAMIs,
contact the GTFCC Secretariat**
