PAMIs

Identification of PAMIs

How to target cholera control and elimination strategies and improve the effectiveness of National Cholera Plans (NCPs)?

Control

Identification of PAMIs for cholera control

Elimination

Identification of PAMIs for cholera elimination

PAMI review

GTFCC PAMI reviews

Ensuring that PAMIs have been identified with a GTFCC method before initiating intervention planning

The identification of Priority Areas for Multisectoral Interventions (PAMIs) is of critical importance to target national cholera control and elimination strategies along the principles of the [Global Roadmap to End Cholera](#).

Which countries should request a review?

Any country that identified its PAMIs can benefit from a GTFCC PAMI review.

GTFCC PAMI reviews are formally required for countries that plan to prepare a request for Oral Cholera Vaccines for preventive use and/or to submit their National Cholera Plan (NCP) for GTFCC endorsement.

What are GTFCC PAMI reviews?

- GTFCC PAMIs reviews:
- Are carried out upon request of National Authorities
 - Represent an opportunity to have independent technical feedback on the identification of PAMIs before moving on to planning interventions in PAMIs
 - Are performed by experts from the GTFCC using standard criteria
 - Focus on providing practical advice and recommendations to countries

When to request a review?

It is recommended to request a GTFCC PAMI review shortly after completion of PAMIs identification, before moving on to intervention planning in PAMIs

How to request a review?

National Authorities are invited to address their request for a GTFCC PAMI review to the GTFCC Secretariat (GTFCCsecretariat@who.int) and to attach the following:

- PAMI identification report
- Completed GTFCC PAMI Excel tool
- Map of PAMIs

How long does it take?

Countries can expect the GTFCC PAMI review to be completed in about 30 days

Template report on the identification of PAMIs for cholera control

I. Background

- Information on any previous identification of PAMIs (method, analysis period)
- Information on NCP status and targets (past, current, and future) in the country
- Concise description of the cholera epidemiological situation in the country in recent years (up to last 10 years)
- Concise description of cholera surveillance system
- Concise description of cholera testing strategy
- Justification for using the method "PAMIs for cholera control" (i.e., provide percentage of NCP operational geographic units with cholera outbreaks cumulatively over the past five years)

II. Methods

Datasets

General

- Administrative level of NCP operational geographic units
- Duration of analysis period

Priority index

- Sources of data for epidemiological and testing indicators
- Assessment of quality of the data
- Management of missing data
